Contrôleur de débit type "C"

tipo FR/C controllo flusso

Type "RT" flow control and fluid
temperature indication
Typ "RT" Durchflusskontrolle
Temperaturanzeige
Type "RT" contrôle de débit avec
indication de la température

tipo FR/RT controllo flusso e temperatura

Type "RMT" flow control and fluid temperature
indication, supply manifold, hose connections in
downward position
Typ "RMT" Durchflusskontrolle
Temperaturanzeige und Vorlaufverteilerleiste
mit nach unten liegenden Schlauchanschlüssen
Type "RMT" contrôle de débit avec indication de
la température et rampe de distribution avec
vannes, raccords dirigés vers le bas

tipo FR/RMT controllo flusso e temperatura più distributore, portagomma rivolti verso il basso

Type "RWT" (optional) hose connections
in upward position
Typ "RWT" (Sonderausführung)
Schlauchanschlüsse oberlegend
Type "RWT" (sur demande) avec
raccords tuyaux vers le haut

tipo FR/RWT con portagomma rivolti verso l'alto

MAX Temperatur + 80° C
MAX Druck 7 bar

Il Flow Regulator è componibile da una a dodici zone e può essere fornito in diversi tipi in funzione del suo particolare impiego.

The Flow Regulator can be assembled from one to twelve zones and can be supplied in various types.

Durchflussmengenregler kann bis zu 12 Kreise umfassen und ist in verschiedenen Ausführungen lieferbar.

Le Débit-mètre est composable à partir d'une zone jusqu'à 12 et peut être de différents types selon son utilisation particulière.

Sono costruiti in quattro dimensioni sia nella forma diritta che in quella ad angolo. Sono intercambiabili ed unitamente ai tubimetrici ed ai galleggianti consentono un'ampia possibilità di variare la portata del fluido.

Are available in four different sizes and in two versions, straight and elbow. They are all interchangeable, and in conjunction with the calibrated tubes and floats they cover a very wide range of applications and fittings.

4 verschiedenen Größen und zwei Ausführungen, gerade und abgewinkelt. Sie sind alle austauschbar und decken in Verbindung mit den Messröhren und Schwimmern fast alle Einsatzgebiete und Anschlussmöglichkeiten ab.

Disponibles en 4 diamètres dans les versions droites et à angle droit, interchangeables et en combinaison avec les tubes gradués et flotteurs, ils offrent de nombreuses possibilités de variation des plages de débit.

Facilmente smontabile per una periodica pulizia senza l'uso di particolari attrezzature. Costruito in due grandezze

Easily dismantled without special tools, thus the tube can easily be cleaned if necessary. Available in two sizes

Zur Reinigung einfach ohne Werkzeug demontierbar. Es sind zwei Versionen lieferbar

Facilement démontable sans outil particulier pour nettoyage périodique. Existe en 2 diamètres
